

Site name, date of visit, & coordinates

Are the site descriptions and photos accurate, adequate, and up-to-date? If not, please explain. E.g., Are there any landing or access issues? How many tent sites did you observe? Is any infrastructure in disrepair?

Are there hazards present that pose a danger to users of the site? E.g., Are there dangerous trees, issues with landing, erosion/unstable ground, etc.

Is there fresh water present at the site or nearby? Please describe location and strength of flow or note if an expected fresh water source was dry.

Did you do any caretaking at the site? If yes, what caretaking actions did you complete?
